ABOUT ME

Front-end web developer with 1 year of work experience creating modern and optimized websites, employing cutting-edge technologies, and collaborating effectively in cross-functional teams under SCRUM methodologies. Proficient in technologies such as Next.JS, React, Typescript, Zustand, Git and integrating REST APIs. Passionate about clean code standards, mobile-first principles, component-based development, web animations and web design. Currently based in Colombia, but will relocate to Germany in June 2024.

WORK EXPERIENCE

Front End Developer

Vuedata [11/2023 – Current]

City: Remote

Responsibilities:

- Develop a package management application to track the status of shipped packages, integrating multiples APIs and adhering to good practices and component-based development.
- Renew the marketing website for the application and refactor the existing base code to utilize React and TypeScript, to enable easy maintainability and scalability.
- Conduct daily meetings with front-end, back-end, and team lead to facilitate effective communication and alignment across development teams.

Achievements:

- Successfully launched the package management application, integrating multiple APIs to enhance package tracking capabilities, resulting in improved efficiency and customer satisfaction.
- Overhauled the marketing website for the application, implementing a complete code refactor to leverage React and TypeScript, leading to a more responsive and user-friendly interface.
