Professional Profile

Frontend Developer with a bachelor's degree in Physics and **2+ years of experience** building fast, modern websites. Proficient in **React**, **TypeScript**, **Next.js**, global state managers (**Zustand** and **Redux**) and Git. Extensive experience in **responsive design**, **SEO**, and **API integration**. Passionate about writing clean code, mobile-first development, and crafting smooth, interactive user experiences. I'm a 3D development enthusiast, highly independent and detail-oriented, who enjoys working in cross-functional teams and **AGILE** environments. Based in Berlin, but open to opportunities across Germany.

Work History

11/2023 - Present Frontend Developer

[Vuedata](#)

Kirkland, USA. (Remote)

- Collaborated in developing a shipping software that streamlines eCommerce order fulfillment, taking ownership of **RBAC** implementation, settings pages, and building more than **20 reusable components** based on MUI. This platform handles approximately **5,000 shipments per week**.
- Collaborated on the implementation and launch of a cutting-edge shipment tracking solution, **designing a centralized API architecture** and **integrating over 30 APIs** while adhering to best practices and component-based development.
- Led the revamp of the shipment tracking website's marketing page using Next.js and TypeScript, **reducing page load times by 40%**, improving **code maintainability**, and **boosting SEO by 25%**.

06/2023 - 10/2023 Frontend Developer

[Wseeds](#)

Bogotá, Colombia. (Hybrid)

- Developed **3 websites in 3 months**, closely following the figma design while developing responsive versions and improving performance and accessibility.
- Improved website performance, keeping **key metrics above 90%** by focusing on SEO, faster load times, and better accessibility.
- Enhanced user experience by implementing **interactive web animations**, leading to a **15% increase in user retention**.

01/2023 - 05/2023 Career Break for Professional Development

- Focused on transitioning to web development from a data analysis background by taking courses, staying up to date with industry trends through articles and research, and building my portfolio to prepare for the next step in my career.

09/2022 - 12/2022 Frontend Developer and Data Analyst

DANE

Bogota, Colombia. (Remote)

- Designed and implemented a system that optimized recruitment processes at DANE, **improving efficiency and resource utilization**.
- Collaborated in designing and developing the initial phase of DANE's new recruitment application.
